## RESPONSE

The present invention teaches a suppository which contains lytic enzymes which are specific for specific bacteria. Each lytic enzyme is specific for only one specific bacteria. The use of the term "enema" in the claims was an error. Support for the suppository is found on page 14, line 6 of the specification.

The application is now in condition for allowance. Please call the undersigned at (301) 603-9071 if you have any questions or comments. Thank you.
